Three brothers, Williamsons, owned the mill, and had in the colony mother, father, sisters, wives and children. Hastily charging the women to care for themselves, the brothers set about saving the property if possible. But before the hose could be brought to bear, the saving of life alone became the stake in the dreadful encounter. The brothers, as proprietors, seem for atime to have been full of calm, brave discretion, and, with the full realization of the sudden danger in the first rush of the tormado, attempted systematic plans of preservation. No heed was paid-him, and with painful limps and piteous whines he returned systematic plans of preservation.

#### CONSUMPTION. ITS CURE AND ITS PREVENTIVE.

By J. H. SCHENCE, M. D. Many a human being has passed away for whose leath there was no other reason than the neglect of mown and indisputably proven means of cure. Those near and dear to family and friends are deeping the discusses simpler into which, had they calmiy adopted steeping the disciplies stamber into which, and they caimly adopted BR. JOSEPH H. SCHENGU'S SIMPLE TREATMENT.

and availed themselves of his wonderfully effications medicines, they would not have failen. Br. Schenck has in his own case proved that wherever sufficient vitality remains, that vitality, by his medicines and his directions for their use, is quickened into healthful vigor.

In this statement there is nothing presumptiona. To the faith of the invalid is made no representation that is not a thousand times substantiated by living said visible works. The theory of the cure by Dr. Schenck's medicines is as simple as it is marking, the philosophy remires no argument. It is self-assuring, self-scowinging.

The Sea-weed Todan and Mandrake Pills are first two weapons with which the clauded of the maindy his assailed. Two-thirds of the shock of consumption originate in dyspensia and a functionally disordered liver. With the condition the bronchial imbes "sympathlye" with the stomach. They re-

Fresh his und riding one especially in this section of the country, in the full and winter season, are all wrong. Physicians who recommend that course less their patients, if their lungs are hadly diseased; and yet, because they are in the house they must not all down quiet; they must wait the troom as much and as fast as the strength will bear, to get up a good elimitation of board. The patients must keep in good spirits—be descruined to get well. This has a great deal to do with the appetite, and is the great point to grin.

To despair of our above such evidence of its possibility in the worst cases, and moral certainty in all others, is shintly. Dr. Schemek's personal statement to the Faculty of his own cure was in these modest works:

"Many years ago I was in the last stages of consumption; confined to my bed, and at one time my physicians thought that I could not live awayed; then like a drowning man catching at straws, I heard of an debanked the preparations which I now offer to the public, and they made a perfect cure of me. It wends to me that I could set them penetrate my whole system. They soon ripened the matter in my house, and I would spit up more than a play of offen-
